

# 2019 MAJOR – Society and Culture

(Qualifying Major for Bachelor of Business Administration with the degree of Bachelor of Arts)

Cultural Studies examines culture through the lens of social justice. As such, it explores contemporary social and cultural contexts in which demands for social justice - including equity, access and empowerment - have been made by diverse communities. The programme enables students to reflect on the relationship between identity, embodied experience and the pursuit of social justice. It prompts students to think through different strategies for moving towards social justice, and the role of representation and cultural forms in those strategies. Students focus on a range of systems of representation including the law, film, news media, life narratives, digital and live performance, graffiti, art advertising, celebrity culture and medical and scientific imaging.

**The table below is a suggested first session for students beginning in Session 2, 2019.** Please make your selection of units after reviewing the requirements of your award in the 2019 Handbook:
