

2019 Bachelor of Business Analytics with the degree of Bachelor of Security Studies

This program combines Macquarie's Business Analytics and Security Studies degrees. Discover insights hidden in big data by studying the Bachelor of Business Analytics. The amount of information created by websites, social media, enterprise resource planning systems and corporate databases is perpetually growing - meaning organisations increasingly need people who can extract and understand meaningful information from big data. It is a new trend that will define how society makes decisions in the future.

The Bachelor of Business Analytics combines knowledge and skills from both business and science to enable you to understand how to understand and work with big data. Developed in consultation with industry, this degree will teach you about: quantitative analysis, business information systems, database programming, business management and decision making.

The Bachelor of Security Studies presents a contemporary approach to security studies, encompassing risk management strategies, emergency response, national resilience, law enforcement and the use of military force. The broad scope of the program reflects the Australian government's expanded definition of national security and targets industry needs for graduate skills and capabilities.

The table below is a suggested first session for students beginning in Session 2, 2019. Please make your selection of units after reviewing the requirements of your award in the 2019 Handbook:

www.handbook.mq.edu.au/2019/DegreesDiplomas/Degree/Bachelor+of+Business+Analytics+with+the+degree+of+Bachelor+of+Security+Studies

Suggested First Session

Session 2, 2019

| Unit Code | Unit Name |
|-----------|---|
| BBA102 | Principles of Management |
| PICT112 | Strategy and Security in the Indo-Pacific |
| PICT111 | Security in an Age of Risk |
| STAT170 | Introductory Statistics |

- You must also meet the general requirements for the degree for which you will qualify.
- It may be possible to satisfy the requirements of your degree by taking a different selection of units in your first session from those suggested above.
- Consider what units you will want to study in second and third year. Prerequisite requirements for those units must be completed prior to enrolment in the higher-level unit.
