

2019 Telecommunications Engineering

For Bachelor of Engineering (Honours)

Macquarie engineers will graduate with an international qualification with the capability for life-long learning. Study in telecommunications engineering develops an in-depth understanding of a specific aspect of engineering, with sufficient focus for employment in an initial role. An underpinning knowledge in programming, signals and systems, probability, circuits and analog/digital systems is developed into an in-depth understanding by research and industry engagement in communications protocols, data communications networks, wireless systems and telecommunications systems.

The table below is a suggested first session for students beginning in Session 2, 2019. Please make your selection of units after reviewing the requirements of your award in the 2019 Handbook:

[www.handbook.mq.edu.au/2019/DegreesDiplomas/Degree/Bachelor+of+Engineering+\(Honours\)](http://www.handbook.mq.edu.au/2019/DegreesDiplomas/Degree/Bachelor+of+Engineering+(Honours))

This program assumes that students have at least Band 4 in HSC Mathematics. If you meet this requirement you should use the following table. If you do not meet this requirement please see the following page.

Suggested First Session: for students with HSC Mathematics Band 4-6 or Extension 1 Band E2-E4 or Extension 2

Session 2, 2019

Unit Code	Unit Name
ENGG100	Introduction to Engineering
MATH135 *	Mathematics 1A
PHYS140	Physics 1A
Elective	Choose an elective unit

- You must also meet the general requirements for the degree for which you will qualify.
- It may be possible to satisfy the requirements of your degree by taking a different selection of units in your first session from those suggested above. Consult the Handbook at the above link to ensure all degree requirements are met when planning options and electives. Many Engineering-designated units are offered outside of the department. Units with an Engineering designated are listed in the Handbook.
- Consider what units you will be completing later in the degree when selecting electives, as many second and third year units have prerequisites (prior knowledge) which must be completed prior to enrolment in the higher-level unit.
- * MATH132/MATH133 are suitable alternatives to MATH135/MATH136 for those with strong mathematics skills.
- If you are starting your degree with recognition of prior learning, through alternative pathways, or through MUIC you should seek academic advice <http://www.goto.mq.edu.au/advice>.

If you do *not* have a Band 4 or higher in HSC Mathematics you should use the following table:

Suggested First Session: for all other students	
Session 2, 2019	
Unit Code	Unit Name
ENGG100	Introduction to Engineering
MATH130	Mathematics IE
COMP115	Introduction to Computer Programming
Elective	Choose an elective unit

- All students can receive specific program advice from the faculty at any stage in their degree by lodging a “Program Advice” enquiry via <http://ask.mq.edu.au>.
