

2018 MAJOR – Information Systems and Business Analysis

(Qualifying Major for Bachelor of Science with the degree of Bachelor of Laws)

The Information Systems and Business Analysis major is a cross-disciplinary major that aims to provide an understanding of a wide range of areas related to information systems, information management and information technology (IT) from both business and IT perspectives. Students develop skills and experience in information creation, storage, retrieval, quality and management in an organisational context and will gain an understanding of all phases of the software development lifecycle, including requirements, analysis, design, development and management of software systems. The major will provide graduates with practical IT and problem solving skills of relevance to careers requiring a BA.

The table below is a suggested first year program guide to support your enrolment. Please make your selection of units after reviewing the requirements of your award in the 2018 Handbook:

www.handbook.mq.edu.au/2018/DegreesDiplomas/Degree/Bachelor+of+Science+with+the+degree+of+Bachelor+of+Laws

- You must also meet the general requirements for the degree for which you will qualify.
- It may be possible to satisfy the requirements of your degree by taking a different selection of units in your first year from those suggested above.
- Consider what units you will want to study in second and third year. Prerequisite requirements for those units must be completed prior to enrolment in the higher-level unit.
- All students must complete one People unit and one Planet unit. Criteria and available units can be viewed at www.handbook.mq.edu.au/2018/Units/Planet and www.handbook.mq.edu.au/2018/Units/People.
- You can receive specific program advice from the faculty at any stage in your degree by lodging a “Program Advice” enquiry via <http://ask.mq.edu.au>.
