

# 2018 MAJOR – Business Information Systems

(Qualifying Major for Bachelor of Science)

This major will give you the IT skills to use, manage and develop business information systems for accounting, marketing and finance. Understanding the business impacts of information systems is a skill that's in demand. Organisations rely on IT and web technology to engage customers, boost productivity and improve efficiency. By completing this major you will learn about different types of information systems, the content within them, and the roles they play in organisations. Areas covered include: mobile commerce, wireless networks, social media, managing customer and supplier relationships, using business intelligence and cloud computing.

**The table below is a suggested first year program guide to support your enrolment.** Please make your selection of units after reviewing the requirements of your award in the 2018 Handbook:
